

FIDEL ANYANWU

COMPUTER SCIENCE / SOFTWARE DEVELOPMENT

fanyanwu@mcneese.edu | Portfolio | GitHub: Fidel2197 | LinkedIn

Computer Science senior with web application projects spanning data analysis, AI integration, and operational interfaces. Experience teaching programming labs, testing robotics prototypes, and supporting university residents.

EDUCATION

McNeese State University | B.S. in Computer Science

Expected December 2026 | GPA: 3.50/4.00

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL/T-SQL, HTML, CSS

Applications & data: React, Next.js, FastAPI, pandas, NumPy, PostgreSQL, Supabase, SQL Server, REST APIs

Tools & practices: Git/GitHub, Docker, Vercel, automated testing, debugging, technical documentation

SELECTED PROJECTS

DataDock | React, FastAPI, pandas, PostgreSQL

CSV analysis workspace with data-quality reports, charts, cleaning, and export. Includes accounts with private report history, account-isolation tests, and CI checks.

SnapChef | Next.js, TypeScript, Supabase, AI APIs

Food-photo assistant with server-side image analysis, recipe results, preferences, authentication, and saved scan history; supports Gemini or OpenAI configuration.

SignalDesk | Next.js, React, TypeScript, server routes

Incident-response practice workspace with simulated incidents, triage, and response views. Separate integrations retrieve real public status signals from service providers.

CowboysBookstore | Team course project | Django REST, React, Docker

Contributed workflow diagrams and documented testable requirements for registration, search, checkout, sessions, and administration in a collaborative bookstore project.

EXPERIENCE

Resident Assistant

Aug 2024 - Present

McNeese State University Housing

Support 50+ residents with housing questions, maintenance concerns, and campus resources. Mediate conflicts, document outcomes, and coordinate room checks, duty coverage, and programs.

Teaching Assistant

Aug 2023 - May 2024

Department of Computing, McNeese State University

Led weekly JavaScript/HTML labs for 30+ students and reviewed 100+ assignments. Guided debugging and a browser Tetris project covering input, game loops, collision detection, scoring, and rendering.

Lab Research Assistant

Aug 2023 - May 2024

McNeese Department of Computing and Engineering

Built and tested robotics prototypes; calibrated sensors, isolated hardware/control issues, and documented iterations. Presented prototype functionality and testing to 50+ Engineering Week attendees.
